Mealime Meal Plans & Recipes

The image displays three screenshots of the Things 3 app interface, illustrating its features and integration with other apps.

Screenshot 1: Home Screen

Shows the main dashboard with a sidebar containing categories: **Inbox**, **Today**, **Upcoming**, **Anytime**, **Someday**, **Logbook**, **Project**, and **Meet Things for iPhone**. A central area shows a **New To-Do** button, a **New Project** button, and a **New Area** button. A blue circular button with a plus sign is at the bottom right. The status bar shows the time as 12:23 and battery level.

Screenshot 2: App Store Search

Shows the App Store search results for "Quick Find". The results are identical to the home screen categories: **Inbox**, **Today**, **Upcoming**, **Anytime**, **Someday**, **Logbook**, **Project**, and **Meet Things for iPhone**.

Screenshot 3: Settings - Calendar Events

Shows the **Calendar Events** settings screen. It includes a note about displaying events from personal and shared calendars, a **Show Calendar Events** toggle switch (which is turned on), and sections for **iCloud** and **Birthdays**. The **iCloud** section lists several calendars: **Calendar**, **Family**, **Learning**, **Perlot Matériaux**, **Rimini Street**, and **Work**. The **Birthdays** section is currently empty. A blue circular button with a plus sign is at the bottom right.

Screenshot 4: Calendar Integration

Shows a modal for setting a reminder. The title is **Test ...**. It includes a **When?** section with options for **Today** and **This Evening**, and a **Cancel** button. Below this is a calendar view for October 2023, showing days from Monday to Sunday. The 1st of October is highlighted in red. A **Someday** button and a **+ Add Reminder** button are also present. A blue circular button with a plus sign is at the bottom right.

Bottom Navigation

A floating menu is visible on the right side with the following options: **Filter by Tag**, **New Project**, **Select**, **Paste**, and **Share**. A note at the bottom says: **Tap or drag the plus button to create a new to-do.**
